PROJECT

Katipunan Hub Full Stack Developer & Lead Developer Campus engagement and peer-tutoring platform.
- Built a full-stack college platform using Next.js, Tailwind CSS, and Supabase to centralize campus engagement and communication. - Engineered a Peer Learning Center scheduling system, allowing students to book sessions that tutors can seamlessly review, accept, or manage.
Line Tracing Robot Hardware & Embedded Logic Autonomous 2-wheel-drive robot.
- Built an autonomous line-following robot using a 2WD chassis and an L298N Dual H-Bridge motor driver. - Programmed the control logic to process real-time track detection from a 5-channel TCRT5000 IR sensor array and performed hands-on circuit troubleshooting.
